VOL. 4.02

Inspire Your Creativity with Canon

Canon genuine optics are at the core of every PowerShot, EOS camera and VIXIA camcorder. Whether shooting stills or video, a great image begins with a great lens. With over 70 years of innovation in optical technology and over 90 million lenses produced, Canon continues to push the envelope in lens design, achieving ever higher levels of image quality and helping to make it a recognized leader in capturing some of the world's greatest images. Because inspiration happens at any moment, it deserves to be captured just the way it was imagined. From photo and video capture, to printing solutions, service and support, and educational resources, look to Canon to deliver the best.

Innovation for the Perfect Image

EF90 million

Only 27 years since the advent of the EOS System but over 90 million EF lenses produced. What's behind the legend? The images EF lenses create. The perfect expression of the photographer's intent, realized through paramount tools of uncompromising design, precision craftsmanship and endless creative promise. Canon EF lenses continually push forward the cutting edge of technology, inspiring the world's best photographers with lenses that don't just meet their needs, but surpass them – brilliantly.

Unleash Your Creativity with EOS Cameras

A winning combination of innovative design and state-of-the-art performance, Canon EOS is an extraordinary and comprehensive system of digital photography. At the heart of this system are Canon EOS cameras that, along with Canon EF Lenses, represent more than 70 years of expertise at the forefront of imaging technology. No matter the photographer, no matter the occasion, EOS cameras deliver phenomenal still and moving images, providing outstanding tools for creative expression.

70 million EOS

EF90 million

CANON OPTICAL TECHNOLOGY

Great Images Start with Great Lenses

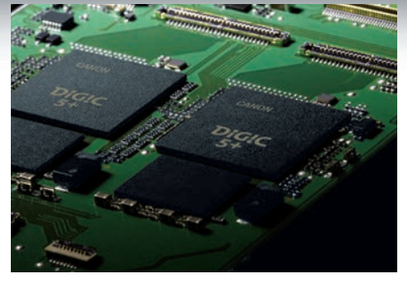
For many photographers, Canon EF lenses alone are reason enough to shoot with the EOS System. A blend of world-class optics, micro-electronics and precision manufacturing technologies, EF lenses are perfected in Canon's laboratories and proven in the field. Canon optics are the preeminent choice of demanding professionals – the lenses are often associated with history's most memorable still and motion images. Pioneers in the use of new materials and innovative optical designs, Canon engineers have achieved ever higher levels of image quality, performance and dependability. Whatever, whenever and wherever you shoot with your EOS cameras, you can count on Canon EF lenses to deliver high caliber imaging performance.

Full-Frame CMOS Sensor (actual size)

CANON CMOS TECHNOLOGY

Pure, High-Resolution Image Capture

Canon develops and produces its own CMOS sensors using proprietary technologies. They fulfill the primary functions of an imaging sensor – sensitive, accurate, low-noise capture of image data – with superb performance. CMOS sensors convert and amplify signals before they are transferred to the image processor, enabling them to produce outstandingly clean image data and help reduce power consumption by as much as 90%. Data transfer speeds are increased by using multi-channel signal paths that improve the camera's responsiveness. Developed in two sizes (Full-Frame or APS-C), Canon CMOS sensors incorporate the latest engineering advances, reducing digital noise and expanding the useful ISO range.



DiG!C 5+

DiG!C 5

DiG!C 4

DiG!C IMAGE PROCESSOR

The Power to Excel

Developed to help maximize performance between the capturing and recording stages of digital photography, Canon **DiG!C** Image Processors use advanced signal processing technologies to enhance image quality and help deliver a noticeably more intuitive, responsive camera. The **DiG!C 4**, **DiG!C 5** and **DiG!C 5+** Image Processors employed in EOS cameras work in concert with Canon CMOS sensors to help achieve even higher levels of performance, with high-end EOS models incorporating Dual Image Processors. Advanced EOS features such as Face Detection Live mode, Full HD video recording, Lens Peripheral Illumination Correction and Auto Lighting Optimizer are all possible thanks to the power of the amazing **DiG!C** Image Processor.

DUAL PIXEL CMOS AF

A Revolution in Autofocus Unlocks the Potential of Live View

Dual Pixel CMOS AF is a cutting-edge technology from Canon that unlocks the potential of Live View, changing forever the way users will shoot video and still images with a DSLR camera. An innovative sensor design powers phase-difference detection autofocus directly on the Canon CMOS sensor, dramatically improving Live View AF and unleashing new possibilities for dynamic, creative capture.

Shoot Video Like a Camcorder

Dual Pixel CMOS AF delivers autofocus performance that is similar to that of a camcorder – but on a DSLR camera! Focus is precise, transitions are smooth and natural, and subjects in motion are tracked consistently over a large area of the frame. The camera locks in outstanding focus quickly and doesn't let go, helping you achieve impressive, cinematic results.

Realize the Freedom of Live View

Live View autofocus powered by Dual Pixel CMOS AF is incredibly accurate and faster than ever. With the freedom of angle inherent to Live View shooting (amplified even more with a Vari-angle monitor as featured on the EOS 70D camera), you can comfortably and easily shoot more subjects, from more perspectives and vantage points, as the situation dictates.

Compatible with 103‡‡ Canon EF Lenses

103‡‡ Canon EF lenses are able to fully realize the benefits of Dual Pixel CMOS AF. Compatible lenses greatly expand creative and compositional possibilities so users can enjoy a wide range of endeavors. STM lenses, for example, help ensure quiet operation during video capture. In short, thanks to Dual Pixel CMOS AF, Canon's renowned optics can now combine with Live View like never before, greatly expanding creative options.

‡ ‡ *As of July 2, 2013.*

EOS FULL HD VIDEO

Cinematic Motion Capture

FULL HD 1080

Select EOS cameras offer 1920 x 1080 Full HD video recording with many recording options and quality rivaling that of professional movie camcorders. Many offer shooting in a number of frame rates and resolutions as well as a choice between All i-frame or IPB compression, delivering files that can be ideal for post production. The wealth of superb EF lenses that make EOS photography so remarkable can also be used in shooting video; you can even shoot with specialty lenses, such as macro and tilt-shift lenses, or STM lenses for incredibly quiet operation. You can also take advantage of Canon's amazing Movie Servo AF (available on select models), which utilizes Dual Pixel CMOS AF or Hybrid CMOS AF, for fast, accurate focus when shooting in Live View and for continuous autofocus tracking while recording. By shooting video with a large sensor camera, it's simple to take advantage of the image quality and characteristics intrinsic to SLR photography. Because the photographer has access to the EOS cameras' extended ISO sensitivities and exposure control capabilities, depth-of-field can be manipulated with ease. Big sensors also capture more light and can record at high ISO sensitivities with less digital noise.

AUTOFOCUS TECHNOLOGY

Fast, Accurate, Sophisticated AF

EOS cameras feature cutting-edge AF performance, representing the latest technical innovations. Cameras like the EOS-1D X and EOS 5D Mark III feature Canon's 61-Point High Density Reticular AF for outstanding speed and accuracy. Other AF systems provide not only a large AF coverage area, but also tremendous control over focusing point selection. The focusing point can be selected automatically by the camera or manually by the user. Advanced Canon focus tracking technology helps maintain accurate AF even with fast-moving subjects and is one of the hallmarks of Canon EOS technology.

EOS SYSTEM

Outstanding Imaging

The EOS System accommodates a broad spectrum of photographers and photographic needs with a comprehensive array of more than 60 interchangeable EF lenses, amazing Speedlite flashes and numerous system accessories. You can choose powering options for both cameras and flashes, including battery grips and battery packs, Wireless File Transmitters, remote controls, and viewfinder accessories, including focusing screens. Growing with photographers' needs, the EOS System is superb in its ability to enhance shooting power, customization and versatility.

BUILT-IN WI-FI® AND GPS TECHNOLOGY

Integrated Simplicity and Convenience For Your Travels

EOS cameras with built-in Wi-Fi® technology incorporate cutting-edge features so it's convenient to share your master-pieces from almost anywhere through CANON iMAGE GATEWAY#. Images from the camera can be emailed to friends and family or uploaded instantly, and photos can even be printed on a PictBridge (wireless LAN) compatible printer without the need for a PC. And with Canon's exclusive EOS Remote app✧ and built-in Wi-Fi® technology, the camera can connect directly to your iOS® or Android™ smartphone^ for remote operation. Full DLNA (Digital Living Network Alliance) compatibility means easy sharing between the EOS camera and other DLNA certified products, like HDTVs, game consoles and more.

In addition to built-in Wi-Fi® capabilities, select EOS cameras like the EOS 6D camera also feature built-in GPS§. An EOS camera with built-in GPS can record longitude, latitude and altitude data as EXIF data, has a logging function that can track movement at set intervals and can even set the camera's internal clock to local time! Perfect for the traveling photographer, the feature helps ensure you will always know where and when you took a photo; when you use the bundled map software, you can even see the exact route you travelled!

This software uses Google Maps for displaying maps.

EOS REMOTE APP✧

Compose & Capture

With a Wi-Fi® enabled EOS camera within range and the Canon EOS Remote app✧ launched, it's as if the necessary shooting controls of the camera were moved onto a smartphone. The EOS Remote app displays the Live View image plus shooting information such as aperture, shutter speed settings, and autofocus, allowing you to remotely release the shutter. Useful for self-portraits and group shots, wildlife and nature photography, or shooting from a distance, it's as simple as the push of a button with the EOS Remote app.

Browse

Searching, viewing, organizing and erasing images shot on a compatible EOS camera is incredibly fast and simple with the EOS Remote app✧ installed on a smartphone^. Images can be easily viewed and sorted by date, folder or rating.

Transfer & Share

With the EOS Remote app✧, transferring, saving and sharing photos is a breeze. Easily save images to a compatible smartphone^ with a simple touch of a button, share to social networking sites or send by email.

 # One-time registration required on CANON iMAGE GATEWAY online photo album. ✧ This software enables you to upload images to social network services. Before uploading images, please be aware that image files may contain privacy related information such as people and places. If necessary, please delete such information. Canon does not obtain, collect or use such images or any information included in such images through this software. ^ Compatible with iOS version 5.0 or later and Android devices version 2.3/4.0 or later. Data charges may apply. § In certain countries and regions, the use of GPS may be restricted. Therefore be sure to use GPS in accordance with the laws and regulations of your country or region. Be particularly careful when traveling outside your home country. As a signal is received from GPS satellites, take sufficient measures when using in locations where the use of electronics is regulated.

The Ultimate EOS

- 18.1 Megapixel Full-Frame CMOS sensor, 14-bit A/D conversion, wide range ISO setting 100–51200 (L: 50, H1: 102400, H2: 204800) for shooting from bright to dim light and next generation Dual **DiG!C 5+** Image Processors for enhanced noise reduction and blazing processing speed.
- 61-Point High Density Reticular AF including 41 cross-type AF points with f/4.0 lens support including 5 dual diagonal AF points (sensitive to f/2.8) and cross-type AF support at f/8*** (center point), AF point illumination during AI Servo*** for easy viewing, plus EOS iTR (Intelligent Tracking and Recognition) AF for accurate subject tracking.
- EOS iSA (Intelligent Subject Analysis) System powered by a dedicated Canon **DiG!C 4** Image Processor, featuring a 100,000-pixel RGB Metering Sensor with subject and color recognition for reliable AE.
- EOS HD Video with manual exposure control and multiple frame rates (1080: 30p (29.97) /24p (23.976) / 25p, 720: 60p (59.94) / 50p, 480: 60p (59.94) / 50p) with 4GB automatic file partitioning (continuous recording time 29 minutes 59 seconds) with selectable "All i-frame" or IPB compression.

18.1 Megapixels | Up to 51200 ISO | Up to 12.0Δ Frames Per Sec.

61-Point High Density Reticular AF

The EOS-1D X camera features Canon's 61-Point High Density Reticular AF, which is quite simply the fastest, most comprehensive AF system Canon has ever produced.

KIT CONTENTS

- EOS-1D X Digital SLR Body
- Eyecup Eg (not shown)*
- Battery Pack LP-E4N*
- Battery Charger LC-E4N*
- Stereo AV Cable AVC-DC400ST*
- USB Interface Cable IFC-200U*
- Wide Neck Strap L7
- Cable Protector
- EOS Digital Solution Disc
- Software Instruction Manual (not shown)

Δ The maximum continuous shooting speed is restricted to 10 fps when the battery charge is less than 50% or when ISO speed is above 32000. If the camera's internal temperature is low and ISO speed is above 20000, the maximum continuous shooting speed is restricted to 10 fps.

The Power to Create

- 22.3 Megapixel Full-Frame CMOS sensor, 14-bit A/D conversion, wide range ISO setting 100–25600 (L: 50, H1: 51200, H2: 102400) for shooting from bright to dim light and next generation **DiG!C 5+** Image Processor for enhanced noise reduction and exceptional processing speed.
- 61-Point High Density Reticular AF including up to 41 cross-type AF points with f/4.0 lens support and 5 dual diagonal AF points (sensitive to f/2.8) and cross-type AF support at f/8 (center point)***.
- iFCL Metering with 63 zone dual-layer metering sensor that utilizes AF and color information for optimizing exposure and image quality.
- EOS HD Video with manual exposure control and multiple frame rates (1080: 30p (29.97) / 24p (23.976) / 25p, 720: 60p (59.94) / 50p, 480: 30p (29.97) / 25p with 4 GB automatic file partitioning (continuous recording time 29 minutes 59 seconds), selectable “All i-frame” or IPB compressions, embedded timecode, manual audio level control while recording, headphone terminal and uncompressed HDMI output***.

22.3 Megapixels | Up to 25600 ISO | Up to 6.0 Frames Per Sec.

Full-Frame Canon CMOS Sensor
The Canon manufactured Full-Frame CMOS sensor delivers professional performance with digital convenience. EOS DSLR cameras with full-frame sensors do not require a focal length conversion factor. They deliver high resolution with amazingly low noise and wide dynamic range.

KIT CONTENTS

EOS 60D

An EOS with Perspective

- 18.0 Megapixel CMOS sensor and **DiG!C 4** Image Processor for high image quality and speed.
- ISO 100–6400 (expandable to 12800) for shooting from bright to dim light.
- Full HD Video with manual exposure control, expanded recording, Movie Crop recording in 640 x 480, sound recording level adjustment and an external microphone IN terminal for access to improved sound quality.
- Vari-angle 3.0-inch Clear View LCD monitor for shooting at low angles and 1,040,000-dot VGA with reflection reduction using multi coating and high-transparency materials for bright and clear viewing.
- 5.3 fps continuous shooting up to approx. 58 Large/JPEGs and 16 RAW.
- 96% viewfinder coverage allowing you to see more of your image in the viewfinder.

18.0 Megapixels	Up to 6400 ISO	Up to 5.3 Frames Per Sec.

Vari-angle LCD Monitor
The Vari-angle monitor flips out from the back of the camera and can easily be adjusted over a wide range of viewing positions – even facing forward – to enable shooting at a variety of unconventional angles.

EOS REBEL SL1

The World's Smallest and Lightest Digital SLR Camera**

Small Size, Big Possibilities

- World's smallest and lightest digital SLR camera** featuring a 18.0 Megapixel CMOS (APS-C) sensor, ISO 100–12800 (expandable to H: 25600) for stills and ISO 100–6400 (expandable to H: 12800) for videos for shooting from bright to dim light, and high performance **DiG!C 5** Image Processor for exceptional image quality and speed.
- High speed continuous shooting up to 4.0 fps allows you to capture the action.
- EOS Full HD Movie mode with Movie Servo AF for continuous focus tracking of moving subjects, manual exposure control and multiple frame rates (1080: 30p (29.97) / 24p (23.976) / 25p, 720: 60p (59.94) / 50p, 480: 30p (29.97) / 25p), built-in monaural microphone, manual audio level adjustment, and Video Snapshot with editing for expanded movie shooting options.
- Touch Screen Wide 3.0-inch Clear View LCD monitor II (approximately 1,040,000 dots) with smudge-resistant coating features multi-touch operation with direct access to functions for setting changes and Touch AF for an easy, intuitive experience and clear viewing when outdoors; an Optical Viewfinder with approx. 0.87x magnification makes subjects easier to see.

18.0 Megapixels | Up to 12800 ISO | Up to 4.0 Frames Per Sec.

Compact and Lightweight
The compact, lightweight EOS Rebel SL1 camera brings amazing portability to DSLR photography. It is astonishingly small while still providing the benefits of an SLR camera.

KIT CONTENTS

* Also available as optional accessory.*

EOS REBEL T3i

The Essence of EOS Photography

- 18.0 Megapixel CMOS (APS-C) sensor and **DiG!C 4** Image Processor for high image quality and speed.
- ISO 100–6400 (expandable to 12800) for shooting from bright to dim light.
- Full HD Video with manual exposure control, expanded recording [1920 x 1080 Full HD Video at frame rates of 30 (29.97), 24 (23.976) and 25.0 frames per second] with Movie Digital zoom and Video Snapshot features for enhanced movie shooting options.
- Vari-angle 3.0-inch Clear View LCD monitor (3:2) for shooting at high or low angles and 1,040,000-dot VGA with reflection reduction using multi coating and high-transparency materials for bright and clear viewing.
- Scene Intelligent Auto mode and Picture Style Auto incorporating the EOS Scene Detection System to capture beautiful scenes with ease.
- Express your creativity with advanced imaging features like Basic+ function, Multi-Aspect function and Creative Filters.

18.0 Megapixels | Up to 6400 ISO | Up to 3.7 Frames Per Sec.

Expandable ISO
With the wide ISO range of 100–6400, expandable to ISO 12800, the EOS Rebel T3i camera has the flexibility to shoot in more situations including low light, and capture beautiful, clear images.

ISO 12800 (expanded)

KIT CONTENTS

- EOS Rebel T3i Digital SLR Body
- Eyecup Ef (not shown)*
- Wide Strap EW-100DB III
- Stereo AV Cable AVC-DC400ST*
- USB Interface Cable IFC-130U
- Battery Pack LP-E8*
- Battery Charger LC-E8E*
- EOS Digital Solution Disc
- Software Instruction Manual (not shown)

* Also available as optional accessory.*

EOS Rebel T5

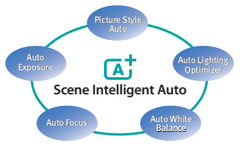
NEW

EOS Performance Made Simple

- 18.0 Megapixel CMOS (APS-C) image sensor and high-performance **DiG!C 4** Image Processor for excellent speed and quality.
- EOS Full HD Movie mode helps you capture brilliant results.
- Scene Intelligent Auto mode helps deliver expertly optimized photos and offers improved scene detection for amazing results when shooting at night.
- Feature Guide offers short descriptions of shooting modes, settings and effects for easy operation.
- Continuous shooting up to 3.0 fps allows you to capture the action.
- Large, 3.0-inch LCD monitor for easy viewing and sharing with friends and family.
- ISO 100–6400 (expandable to H: 12800) for shooting from bright to dim light.
- 9-point AF system (including one center cross-type AF point) and AI Servo AF help provide necessary options for impressive autofocus performance and accurate results.

18.0 Megapixels | Up to **6400** ISO | Up to **3.0** Frames Per Sec.

Scene Intelligent Auto
With Scene Intelligent Auto, the camera automatically analyzes the image, taking into account faces, colors, brightness, movement and contrast. It then applies the most appropriate enhancing features to deliver maximum impact.



KIT CONTENTS

- EOS Rebel T5 Digital SLR Body
- EF-S 18–55mm f/3.5–5.6 IS II Lens
- Eyecup Ef (not shown)*
- Wide Strap EW-300D
- USB Interface Cable IFC-130U
- Battery Pack LP-E10*
- Battery Charger LC-E10*
- EOS Digital Solution Disc and Software Instruction Manual CD
- Camera Instruction Manual (not shown)

EOS Rebel T3

The Beauty of Simplicity

- 12.2 Megapixel CMOS (APS-C) sensor and **DiG!C 4** Image Processor for high image quality and speed.
- ISO 100–6400 for shooting from bright to dim light.
- HD Video with expanded recording (HD: 30p (29.97) / 25p), and with in-camera movie editing options.
- High speed, reliable 9-point AF system utilizing a high precision, f/5.6 cross-type center point.
- Enhanced metering with a 63-zone, Dual-layer metering system for accurate metering between exposures.
- Up to 3.0 fps continuous shooting.
- 2.7-inch wide TFT LCD monitor (230,000 dots) with Live View function for improved viewing.
- The Feature Guide offers short descriptions of each function and Quick Control screen for easy operation.

12.2 Megapixels | Up to **6400** ISO | Up to **3.0** Frames Per Sec.

Feature Guide
The Feature Guide helps you quickly master the camera's many shooting options. It provides easy-to-understand descriptions and instructions right on the camera's LCD screen, explaining what steps to take to achieve the desired results.

EOS TECHNOLOGIES

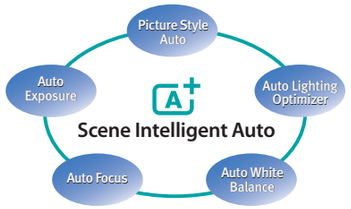
EXTENSIVE ISO RANGE

EOS cameras feature an outstandingly wide ISO sensitivity range, helping to provide remarkable shooting flexibility in diverse photographic situations. The EOS 5D Mark III and EOS 6D cameras, for example, feature the breathtaking standard ISO range of 100–25600, expandable to a low of ISO 50 and high of ISO 102400! Even at higher ISO settings, renowned Canon CMOS sensor and noise reduction technologies work to help ensure superb image quality, enabling high shutter speeds in low-light situations.

ADVANCED EXPOSURE CONTROL

EOS cameras incorporate advanced exposure control systems, which help ensure precise Auto Exposure with a wide range of metering options. iFCL metering, found on select EOS cameras, integrate the camera's AF system into its readings, helping to ensure the subject gets metering priority. Multi-zone Full-frame Evaluative metering helps assure excellent results even in difficult lighting situations. Center-weighted, Partial, Spot and Multi-spot provide advanced photographers extraordinary exposure control, enabling them to capture superb images under the most challenging lighting conditions.

SCENE INTELLIGENT AUTO



Select EOS cameras feature a sophisticated scene analysis system that helps take the guesswork out of making optimal camera settings in a wide variety of shooting situations. Scene Intelligent Auto provides image capture data to the camera's exposure, white balance, picture style and lighting optimizer systems. It merges a number of very complex measurements into settings that help ensure photographs of gorgeous tonality, accurate color, sharp focus and phenomenal detail.

Scene Intelligent Auto

LIVE VIEW FUNCTION

Live View makes it possible to compose and shoot directly from the camera's LCD screen. In addition to functioning as a monitor for video shooting, Live View can be an essential feature for creative photography in numerous situations. You can zoom in and navigate the composition to check critical detail. In the studio, Live View enables remote operation when the camera is connected to a computer (via USB or an optional Wireless File Transmitter).

LiveView MODE

MOVIE SERVO AF

Select EOS cameras feature Movie Servo AF, which takes advantage of Hybrid CMOS AF or Dual Pixel CMOS AF systems to help ensure continuous, accurate autofocus tracking that is optimized for video shooting. The camera locks focus on its subject with great speed and tracks it throughout the composition to keep it focused. When used in conjunction with one of the Canon STM lenses, AF is even quieter and smoother.

Hybrid CMOS AF
Hybrid CMOS AF II

DUAL PIXEL CMOS AF

Dual Pixel CMOS AF is a cutting-edge technology from Canon that unlocks the potential of Live View, changing forever the way users will shoot video and still images with a DSLR camera. Found on the EOS 70D camera, Dual Pixel CMOS AF is powered by an innovative sensor design that enables phase-difference detection autofocus directly on the Canon CMOS sensor, dramatically improving Live View AF and unleashing new possibilities for dynamic, creative capture.

Dual Pixel CMOS AF

PICTURE STYLE TECHNOLOGY

Canon's Picture Style feature makes it easy for photographers at any level to deal with the myriad available camera features and settings. It provides a number of user-friendly presets that facilitate optimal choices based simply on the type of shooting. New presets can be created using Canon's included Picture Style Editor Software, and individual camera settings – such as sharpening, contrast, color tone and saturation – can always be overridden.

Picture Style

AUTO LIGHTING OPTIMIZER

ALO OFF ***ALO ON***

Auto Lighting Optimizer automatically and selectively adjusts image exposure to help ensure accurate brightness and contrast. It can brighten areas of the composition while maintaining highlight detail and darken areas while maintaining shadow detail. Available in Full Auto and other shooting modes, this feature can be used by beginners and fine-tuned by advanced shooters to ensure beautifully-exposed images in a wide variety of lighting situations.

HIGH DYNAMIC RANGE (HDR)

Perfect for capturing scenes with extreme highlights or shadows, High Dynamic Range (HDR) automatically takes three images at varying exposures and then merges them in-camera, capturing a broad range of shadow and highlight detail to deliver one final image with stunning tonal range. Found on the EOS 5D Mark III, EOS 6D and EOS 70D cameras, HDR shooting can be adjusted to cover a range of stops, expanding the parameters of the light and dark detail the camera can record.

HDR High Dynamic Range

TOUCH PANEL LCD

Select EOS cameras feature Touch Panel LCD monitors for easy, intuitive control during image capture and playback. Menu and Quick Control settings can be accessed, and focus point and shutter release can be activated with the touch of a fingertip. Some models even feature capacitive touch technology similar to many of today's popular mobile devices; two-finger gestures (multi-touch operation) can be used for zooming or changing images.

CREATIVE FILTERS

Fisheye Effect

Water Painting Effect

Select EOS cameras offer a number of fun and creative filters that can alter the mood and effect of any particular scene. The filters can be applied to an image after shooting so it's easy to try several effects on the same shot, and real-time display is supported on the EOS 70D, EOS Rebel T5i and EOS Rebel SL1 cameras. Creative Filters include Grainy Black/White, Soft Focus, Fisheye Effect, Toy Camera Effect, Miniature Effect, Art Bold Effect, Water Painting Effect and Miniature Effect Movie.

Creative Filter

DURABILITY

Hold a Canon EOS camera in your hands. The look and feel of quality and reliability are the result of decades of camera-making experience – knowledge that translates to real-world performance and durability second to none. Professional-level EOS cameras employ advanced alloys to help ensure outstanding strength without excessive weight, while an abundance of gaskets and seals provide outstanding water and dust resistance. These are truly precision instruments built to last.

◊◊ *The EOS 5D Mark III and EOS 7D require a firmware upgrade to be compatible with the GPS Receiver GP-E2. Note: When the EOS 7D is used with the GP-E2 the following restrictions will apply: a) geotagging function will not work for movies while recording; b) geotagging features will not work for movies when using the Map Utility; c) electronic compass information and automatic time setting is not available; d) transmission via the hot shoe is not possible.*

EF LENS ADVANTAGE

OVER 60 LENSES

Great Images Start with Great Lenses

Embodying advanced optical, micro-electronic, and precision manufacturing technologies, Canon EF lenses deliver superb image quality and range of choice. There are more than 60 EF lenses covering a wide span of focal lengths, and they include specialty tilt-shift and macro types. They make it possible to capture that perfect shot.

OPTICAL IMAGE STABILIZER

Capture Sharp Handheld Shots in More Situations

Canon Optical Image Stabilizer (OIS) technology uses miniature sensors and a high-speed microcomputer built into the lens. Camera shake is detected and analyzed, then corrected via a special shifting lens group. Because Canon OIS is in the lens, it can be optimized for the focal lengths and optical characteristics unique to each lens.

EOS FULL HD VIDEO

Discover New Motion Capture Possibilities

By taking advantage of large-sensor capture and the standout image quality benefits inherent to Canon EF lenses including beautiful depth-of-field and remarkable low-light capture capabilities, EOS Full HD Video provides shooting options once reserved only for still photography. And with STM lenses, video capture is smooth and quiet.

Spectacular Optics, EOS Performance

STANDARD/STANDARD ZOOM LENSES

Covering a popular range of focal lengths for most photographers, EF standard lenses are ideal for a wide range of shooting situations.

EF 24–70mm f/2.8L II USM • f/2.8 • 1/640 sec.

WIDE-ANGLE/WIDE-ANGLE ZOOM LENSES

Canon EF fixed-focal-length wide-angle lenses are exceptionally sharp and virtually distortion-free, while EF ultra-wide zooms deliver stunning perspectives.

EF 8–15mm f/4L Fisheye USM • f/4 • 1024 sec.

TELEPHOTO/TELEPHOTO ZOOM LENSES

EF telephoto and telephoto zoom lenses deliver legendary image quality and are superb tools for “getting close” to your subjects.

EF 400mm f/2.8L IS II USM • f/2.8 • 1/2000 sec.

SPECIALTY LENSES

Solutions for specialized shooting, Canon TS-E (Tilt-Shift) and Macro lenses are designed for diverse applications from architectural to studio to nature photography.

TS-E 24mm f/3.5L II • f/11 • 20.0 sec.

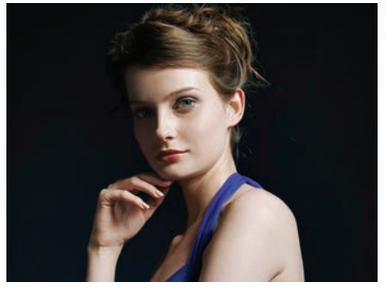
Imaging Excellence Made Easy and Compact

Canon PowerShot digital cameras have been a long-time favorite choice among photographers of all levels. Renowned for delivering still and video images of outstanding quality, advanced performance, quintessential style and ease of use, PowerShot digital cameras feature technological innovation and design elegance among compact cameras. With six different PowerShot camera series to choose from, there's a PowerShot camera that's perfect for you.

GENUINE CANON OPTICS

Uncompromised Image Quality

A great lens is at the heart of every great image. With over 70 years of innovation in optical technology, Canon is recognized as a leading provider of high-performance lenses for a broad range of imaging applications in numerous industries. Canon optical engineers have pioneered the use of new materials and relentlessly pushed the envelope with ingenious lens designs, achieving ever higher levels of image quality and dependability while reducing size and weight. In the world of image capture, Canon lenses have obtained the loyalty of the most demanding professionals and have inspired generations of breathtaking images. When you own a PowerShot camera, you own a Genuine Canon Lens.



DiG!C IMAGE PROCESSOR

Superb Imaging Performance

Since their groundbreaking introduction in 1999, Canon's proprietary **DiG!C** Image Processors have set new standards with each generation to give PowerShot cameras the clear edge in features, performance and image quality. The **DiG!C 4** Image Processor brought high-speed continuous shooting and Full HD video, with the new **DiG!C 4+** Image Processor enabling Full HD 30p video in MP4 format. The **DiG!C 5** Image Processor helped reduce noise in low light and delivered an advanced Multi-Area White Balance system. Select PowerShot models feature the **DiG!C 6** Image Processor, which brings outstanding clarity to low-light shooting, enables advanced video capture with enhanced Dynamic IS for reduced image shake and MP4 video recording.

HS SYSTEM

Shoot with Confidence

The Canon HS SYSTEM lets you take photos with spectacular depth, detail and emotional resonance in an even wider range of situations without sacrificing image quality. Beautiful low-light shots at high ISO speeds are possible with minimal noise and maximum detail in highlight and shadow areas. The system is the result of two technologies brought together in PowerShot cameras: an advanced High-Sensitivity CMOS sensor, which uses a sophisticated design to capture more light; and the **DiG!C 4**, **DiG!C 4+**, **DiG!C 5** or **DiG!C 6** Image Processor, which actively helps reduce noise. The Canon HS SYSTEM lets you use high shutter speeds to capture clear images with reduced noise and blur in a variety of situations for incredible photos and videos.

Wi Fi® CERTIFIED

BUILT-IN WI-FI® TECHNOLOGY

Enhanced Wireless Connectivity

Select PowerShot cameras with built-in Wi-Fi® feature easier connection, so it's simpler than ever to do exactly what you want with your images, wherever you happen to be. Simply press the dedicated Mobile Device Connect Button§§ for one-touch transfer to your iOS® or Android™ device^ where you can start sharing your images right away with the Canon CameraWindow app✧. A single touch connects you to CANON iMAGE GATEWAY# for cloud storage and sharing, and to your PC as well, for the simplest transfer of your images. You can also continue to share images between two Wi-Fi® equipped PowerShot cameras. Ready to print your images? Wireless printing is available with a PictBridge compatible printer.

REMOTE CAPTURE

Remote Operation Via Your Mobile Device

Now you can use your mobile device to control select PowerShot cameras with built-in Wi-Fi®. Simply connect wirelessly to your device^ and access the free Canon CameraWindow app✧. Your device will show a live image of the camera's capture – perfect for a commemorative group photo, wildlife shots and all kinds of situations! The optical zoom, flash, self-timer and shutter release are all under your control, and images are saved to your camera.

NEAR FIELD COMMUNICATION

NFC Support

Select PowerShot models support NFC (Near Field Communication) technology, eliminating the need to find and open the Canon CameraWindow app✧ on your compatible mobile device. Touch the NFC icon located on the camera to your NFC-equipped Android device^^, and the CameraWindow app will launch automatically for quick, easy sharing of your images. NFC also makes it simpler to install the app. Bring both devices together and the download screen displays automatically.

CANON IMAGE GATEWAY

Streamlined Sharing and Transfer

CANON iMAGE GATEWAY# makes it easy to save images to an online photo album, download them automatically to your PC, and direct your images exactly where you want on social networking sites. Share with everyone or selected groups – and add comments in multiple languages – on Facebook®, Twitter®, YouTube™, Flickr® and now Google Drive™. Select PowerShot models with the Image Sync function can automatically switch between cloud-based servers and a specified computer on the same wireless network, especially convenient for dealing with large batches of photos taken on vacation and day-trips. When you get back home you don't have to worry about transferring images to your PC: images uploaded to CANON iMAGE GATEWAY will download to your computer automatically§§.

DUAL CAPTURE

Capture a Story with Every Shot

The innovative PowerShot N100 camera turns moments into stories. It features Dual Capture, using a rear-facing secondary camera that turns your photos or video into a compelling story with behind-the-scenes input. While the main camera shoots the subject, the photographer's reaction is captured with a wide-angle sub-camera, completing the scene by combining the images into a single file, and preserving the moment with an entirely new feel. It's perfect for capturing everything from a parent's pride to a priceless double take.

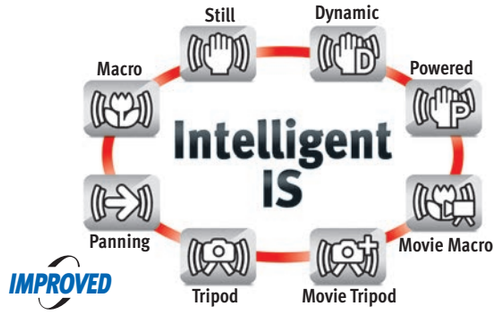
STORY HIGHLIGHTS

Create a Short Story With Your Images

View your still images and video‡ in an exciting highlight reel with the Story Highlights feature on the new PowerShot N100 camera. You can choose to have the camera create one automatically based upon advanced Canon technologies or customize your highlight video. It's all done in camera, without the need for any additional software, and there are several menus to choose from to enjoy your Story Highlights. Simply press the dedicated Story Highlights button to start creating short stories that are uniquely yours.

§§ Initial setup is required. ^ Compatible with iOS versions 6.0/6.1/7.0, Android smartphone versions 2.3.3/4.0/4.1/4.2/4.3 and Android tablet versions 4.0/4.1/4.2/4.3. Compatibility varies with specific camera model. Data charges may apply. ✧ This software enables you to upload images to social network services. Before uploading images, please be aware that image files may contain privacy related information such as people and places. If necessary, please delete such information. Canon does not obtain, collect or use such images or any information included in such images through this software. # One-time registration is required on CANON iMAGE GATEWAY online photo album. ^^ Compatible with Android devices version 4.0 or later.

‡ Videos must be shot in Hybrid Auto.



HD VIDEO

Spectacular High Definition Video

PowerShot cameras bring the fun and excitement of shooting crisp, clear HD videos that you can later watch on your HDTV or download to your computer. Depending on the model, you can shoot in Full HD (1920 x 1080) or 720p HD (1280 x 720); cameras equipped with the **DiG!C 6** Image Processor even record Full HD video at 60p. Canon technologies – such as advanced white balance, Intelligent IS and Smart AUTO – help ensure stunning HD video capture. Stereo sound recording enhances the experience, and a dedicated movie button provides a quick, convenient way to start shooting video.

INTELLIGENT IS

A Smarter Image Stabilization System

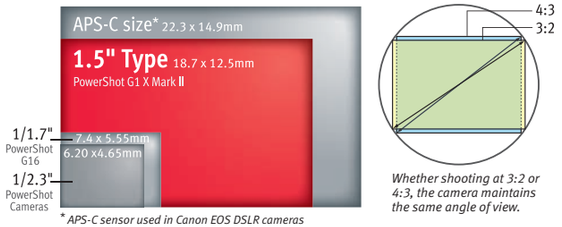
Intelligent IS automatically analyzes camera movement and applies the best shake correction method for the shooting situation. For stills, the system selects from Standard IS, Panning IS, Macro (Hybrid) IS and Tripod modes. When shooting video, the system selects from Dynamic IS, Powered IS, Macro (Hybrid) IS and active Tripod IS modes. Improved for video shooting with new icons, Intelligent IS now also compensates for slight shaking when in active Tripod IS mode. With Intelligent IS, you can concentrate on image capture, letting the camera make the most effective IS settings to prevent blur.

Without OIS *With OIS*

CANON OPTICAL IMAGE STABILIZER

A Steady Image is a Beautiful Image

Handheld shooting can often lead to camera shake, making photos and videos blurry. Canon's Optical Image Stabilizer is a sophisticated system that shifts a lens group to correct unwanted camera movement. It makes handheld photography more practical in more shooting situations. For photos, it enables shooting at slower shutter speeds, accommodating more low-light shooting situations than ever before without having to boost ISO sensitivity. With camera shake reduced, you get a sharper, steadier image.



** APS-C sensor used in Canon EOS DSLR cameras*

Whether shooting at 3:2 or 4:3, the camera maintains the same angle of view.

IMPROVED

1.5" type CMOS

1.5-INCH TYPE CMOS SENSOR

More Light Means Less Noise

The 1.5-inch Canon CMOS sensor captures stills and videos in amazing quality. Nearly the size of an EOS APS-C size sensor, the bigger sensor captures more light with every pixel, enabling incredible low-light performance up to ISO 12800 with minimal noise, a wide dynamic range in shadow and highlight areas, and shallow depth-of-field for sharp images with beautiful background blur. The improved sensor design on the PowerShot G1 X Mark II delivers higher AF speed and captures RAW images natively in 3:2 and 4:3 ratios while maintaining the same angle of view, achieving simply breathtaking images.

PowerShot G1 X Mark II

Share Your Artistic Expression

12.1 Megapixels CMOS | 8x Optical Zoom | 2.8" Tilt, Capacitive Touch Panel LCD

- Built-in Wi-Fi® allows you to wirelessly transfer your images to social networking sites through CANON iMAGE GATEWAY#, to a PC, or upload virtually anywhere on your iOS® or Android™ device^ with the free download of the Canon CameraWindow app✧.
- The convenient Mobile Device Connect Button allows you to connect to your Android™ or iOS® device^ for quick and easy sharing.
- Creative Shot mode uses composition, color and lighting from your original image to create five unique images with an artistic flair.
- 2.8-inch capacitive, tilt, touch panel LCD; lens shutter; and zoom ring offer users a unique and creative way to capture photos.
- 8x Optical Zoom and 28mm Wide-Angle lens with Optical Image Stabilizer reduces camera shake so you achieve brilliant images.
- 12.1 Megapixel High-Sensitivity CMOS sensor combined with a **DiG!C 5** Image Processor creates the Canon HS SYSTEM for improved low-light performance up to ISO 6400 and enhanced image quality.
- Capture stunning 1080p Full HD video with a dedicated movie button, plus zoom while shooting.

28mm WIDE 8x | Wi-Fi CERTIFIED | DiG!C 5 | INTELLIGENT IS | 2.8" Touch 90° Tilt LCD | Zoom Ring | Shutter Ring | Mobile Device Connect Button

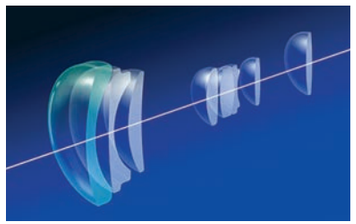
POWERSHOT TECHNOLOGIES

UA LENS TECHNOLOGY



Pioneered by Canon, UA Lens technology makes possible compact lenses with remarkable optical performance. By using molded glass with an ultra-high refractive index in aspherical lens elements, Canon has succeeded in reducing lens size while significantly reducing image aberrations. Another stellar example of cutting-edge Canon optics, UA Lens technology helps make PowerShot digital cameras pocket-friendly and capable of astounding image quality.

UA Lens

IMPROVED CONTINUOUS SHOOTING

Select PowerShot cameras offer a seamless, pro-like shooting experience that's fully available in P, Tv, Av and M modes. Shooting and processing are performed in tandem, which helps eliminate buffering time to deliver full resolution continuous shooting rates comparable to DSLR cameras. With no separate mode setting and no reduction in image quality – and combined with High Speed AF – you can freeze brilliant action shots easily, ideal for sporting events or any situation that unfolds rapidly.

ZOOM FRAMING ASSIST

Without Zoom Framing Assist

With Zoom Framing Assist

Zoom Framing Assist helps you locate subjects even at a distance, making it easy to track them while using the extreme telephoto on select PowerShot models. Plus, with Zoom Framing Assist Lock, the camera locks onto and automatically keeps them in the center of the frame until you're ready to capture the perfect close-up shot. And, on select PowerShot cameras, the camera intelligently zooms in and out to keep faces the same size!

Zoom Framing Assist

CREATIVE SHOT

IMPROVED

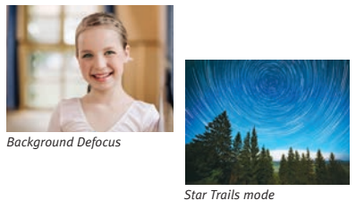
Retro *Monochrome* *Natural* *Special*

Creative Shot mode, found on select PowerShot cameras, easily turns out impressive art photos. Using advanced Canon technology to analyze the scene and select appropriate composition, color adjustments and exposure for any of 46 filter options, Creative Shot captures the original shot plus five additional images. Filter choices are conveniently grouped into Retro, Monochrome, Special and Natural categories to make exploring the world of artistic photography fun and easy.

Creative Shot

CREATIVE SCENE MODES

IMPROVED



Background Defocus *Star Trails mode*

Select PowerShot cameras have added some exciting shooting modes. Star Nightscape, Star Trails, Star Time-Lapse Movie and new Star Portrait modes optimize camera settings so you can capture the beauty of the night sky as never before. Background Defocus adds a pleasing blur behind your subject for artistic portraits. And sub-modes in HDR shooting like Art Bold and Art Vivid imbue your photos with dynamic, striking effects.

Background Defocus

Star

HDR High Dynamic Range

MOVIE DIGEST & HYBRID AUTO

Movie Digest captures up to four seconds of video every time you shoot a still image, and then combines an entire day's clips (which can be edited*) into a single 720p HD* video – great for remembering special events. On select PowerShot cameras, Hybrid Auto automatically detects up to 24 scenes and sets the optimal settings before capturing each video. On certain models, it is even possible to include the picture in the final highlight video.

Movie Digest

Hybrid Auto

SMART AUTO

Smart AUTO makes getting sharp, bright, colorful images simple in a wide range of scenarios. It automatically detects scenes by assessing various factors in both the background and the subject. Detected scenes are analyzed using up to 58 predefined shooting situations. The camera then makes optimal settings to help ensure the best possible image capture, whether you're shooting stills or video. With Smart AUTO, all you have to do is compose and take your shot for amazing results.

Smart AUTO 58 SCENES

RAW MODE

Several PowerShot models include RAW mode, a must for professional photographers and a hallmark of high-end cameras. RAW mode preserves all the information recorded by the image sensor, giving you complete creative control over the editing process. On select PowerShot models, RAW and JPEG formats can be recorded simultaneously; some allow you to choose from among several aspect ratios, including 16:9, 3:2, 4:3, 1:1, and 4:5, when shooting in RAW mode.

RAW

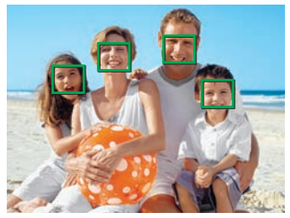
HIGH SPEED AF

Without High Speed AF

With High Speed AF

The greatest photo opportunities are often unplanned. To help ensure you don't miss a thing, Canon continues to advance autofocus technologies so you continue to see improving performance. Throughout PowerShot generations, High Speed AF has featured outstanding speed and accuracy, resulting in significantly reduced shutter lag times. With High Speed AF, you can shoot with greater confidence, knowing you'll capture instant memories the moment you see them happen.

FACE DETECTION AF/AE/FE/WB



The advanced DiG!C Image Processors in PowerShot cameras make possible Canon Face Detection Technology, which helps you get the shot you want every time. When the shutter button is pressed halfway, the camera finds the face or faces in the frame, then adjusts focus, exposure and white balance as needed to help ensure a sharp image with proper illumination and accurate color for both the face(s) and the overall scene.

Face Detection AF/AE/FE/WB

SMART SHUTTER / TOUCH SHUTTER

The Smart Shutter feature uses Canon Face Detection technology to make picture-taking more intuitive. You can have the camera automatically release the shutter when it detects a smile or a wink, or when a person enters the frame. PowerShot models with Touch Shutter enable you to start tracking a subject by pointing to it on the touch panel LCD, then take the picture simply by lifting your finger off the screen.

Touch Shutter

GPS TECHNOLOGY

This software uses Google Maps for displaying maps.

PowerShot digital cameras equipped with Global Positioning System (GPS)§ technology record time and location information with your stills and video. You can use special bundled software to pinpoint your photos on a map and track your travels, making it even more fun and informative to share memories of your adventures. You can also create personalized travel guides with custom maps to share among friends and family.

GPS

** Available on select PowerShot cameras. § In certain countries and regions, the use of GPS may be restricted. Therefore, be sure to use GPS in accordance with the laws and regulations of your country or region. Be particularly careful when traveling outside your home country. As a signal is received from GPS satellites, take sufficient measures when using in locations where the use of electronics is regulated.*

VIXIA CAMCORDERS

FULL HD 1920×1080

Wi Fi CERTIFIED

Capture Your Vision without Compromise

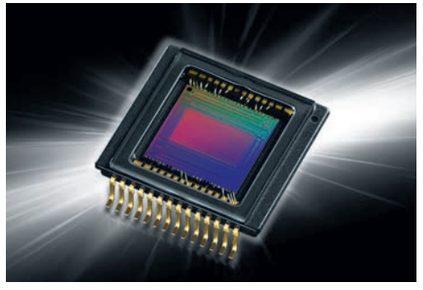
Your vision deserves to be captured with amazing clarity and beauty, and that goal is the driving force behind every Canon imaging innovation. Reflecting decades of leadership in optics and imaging, with an impressive history of excellence in the design and manufacture of professional video products, Canon HD camcorders deliver on the promise of outstanding image quality and performance. Your images in motion are expressions of the time and space that are your world. Entrust their capture to no less than Canon.

CANON HD VIDEO LENS

Experience the Superb Quality of Genuine Canon Optics

HD Video Lens

More than seven decades of manufacturing lenses for professional broadcast and photography are behind Canon's extraordinary expertise in optics, and Canon lenses today enjoy a legendary reputation among professional videographers and photographers. Every Canon camcorder is equipped with a Genuine Canon Video Lens. Our high definition video lenses use aspherical lens technology to achieve low chromatic aberration with high resolution while maintaining compact dimensions. Canon also uses super spectra coating technology to lower flare and ghosting.

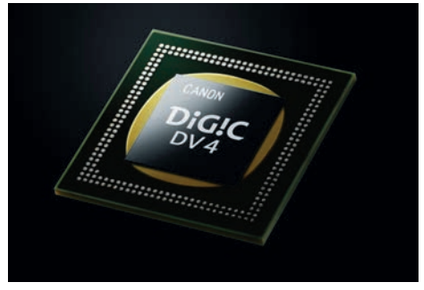


CANON HD CMOS PRO

Shoot High Definition with the Professional's Edge

HD CMOS PRO

Unlike image sensors found in competitive camcorders, the Canon HD CMOS Pro Sensor uses fewer pixels, which are significantly larger and more sensitive, allowing you to capture video with a wide dynamic range. The VIXIA HF G30 and HF G20 camcorders are both equipped with the latest in HD CMOS Pro Sensor technology, providing 20% improved low-light performance*. The VIXIA HF G20 camcorder features a 1/3-inch native 1920 x 1080 image sensor that helps eliminate the need for resizing, allowing for high-resolution Full HD video from lens to screen. The VIXIA HF G30 camcorder uses an increased-area 1/2.84-inch image sensor, which has more pixels to accommodate its large zoom.



DiG!C IMAGE PROCESSOR

Advanced Technology Delivers Superb Clarity

DiG!C DV 4 DiG!C DV III

DiG!C DV Image Processors are a key component of Canon imaging excellence, providing true color and brilliant clarity to video and photos alike. The **DiG!C DV 4** and **DiG!C DV III** Image Processors deliver stunningly realistic color reproduction and sophisticated noise reduction for outstanding low-light performance. The **DiG!C DV 4** Image Processor features increased processing power, letting you record in MP4 and AVCHD formats simultaneously. Improved image stabilization means you can capture smooth, virtually blur-free video even if you're shooting while walking. The **DiG!C DV** Image Processors also power sophisticated technologies including Smart AUTO, Touch & Track, Genuine Canon Face Detection, and Cinema-Look Filters.

** Compared to the Canon HD CMOS Pro Image Sensor used in the Canon 2011 VIXIA HF G10 Camcorder.*

BUILT-IN WI-FI® TECHNOLOGY

Fast, Fun and Easy Sharing

VIXIA camcorders with built-in Wi-Fi® make it fun and easy to stay connected with friends and family, because they give you so many ways to share the spectacular HD video you capture. Share right from the camcorder, or pair it with your compatible smart device – even record and share in fun new ways with remote capture.

View, Save or Upload via iOS Devices

All Wi-Fi® enabled VIXIA camcorders let you connect and upload video to compatible home networks, wireless hotspots, and iOS® mobile devices using the free Canon Movie Uploader app✧. Out shooting? Upload videos to YouTube™ and Facebook® to share what you've captured in real time!

Upload via CANON iMAGE GATEWAY

Videos and photos can be easily shared over the internet through CANON iMAGE GATEWAY# – a free online photo storage service and server. With CANON iMAGE GATEWAY and a Wi-Fi® hotspot, you can upload videos directly from your VIXIA camcorder to Facebook® and YouTube™.

Playback by a Web Browser

With select VIXIA Wi-Fi® camcorders, you can browse through and view previously shot videos on your compatible mobile device or PC without connecting a cable to the camcorder. Simply open a standard Web browser, connect to your camcorder wirelessly and begin remote browsing✧✧.

Media Server

Using your Wi-Fi® enabled VIXIA camcorder, you can easily share your images across compatible devices on the same network. Connect to your camcorder as a media server and enjoy watching your photos and video on an HDTV, PCs and more.

✧ This software enables you to upload images to social network services. Before uploading images, please be aware that image files may contain privacy related information such as people and places. If necessary, please delete such information. Canon does not obtain, collect or use such images or any information included in such images through this software. Compatible with iOS versions 5/6/7 for select devices. MP4 60p and AVCHD recordings are not supported for this function.
✧✧ Compatible with iOS versions 5/6/7, Android smartphone versions 2.3/4.0/4.1/4.2 and Android tablet versions 3.2/4.0/4.1/4.2 for select devices. AVCHD recording is not supported for this function. On iOS devices, MP4 60p recording is not supported; only the playback function is available. # One-time registration is required on CANON iMAGE GATEWAY online photo album.

LIVE STREAMING

Real-time Video Right in Your Hands

Select VIXIA Wi-Fi® enabled camcorders have a Live Streaming function that allows you to view events on your compatible mobile device or tablet, and even stream them over the internet, as they happen! With your camcorder and iOS® or Android™ device on the same network, you can remotely view and record the live video and audio that your VIXIA camcorder is recording by using the free Canon CameraAccess app^ or Canon CameraAccess plus app^^. You can also use your device to control camcorder functions including start/stop and zoom, and access information like battery charge and remaining recording time. These apps make it easy to create perfect self-videos, record hard-to-capture subjects, monitor babies and so much more.

And now with the new CameraAccess plus app^^, you can live stream your video over the internet using your compatible iOS® or Android™ device. Bring faraway friends and family into the action at special events, let grandparents see children as they open presents, monitor pets while you're out – the possibilities are endless! And because the technology turns your mobile device or tablet into a remote controller for your camcorder, operating the VIXIA camcorder and accessing important information is effortless.

CAMERA PAN TABLE

Monitor From Wherever You Are

Monitor wide areas remotely with Camera Pan Table CT-V1, an exciting new optional accessory you can control with a compatible mobile device†††. With your VIXIA camcorder mounted on the pan table, you can monitor a horizontal viewing range of approximately 200º, enough to span two rooms, or manually tilted to accommodate for vertical angles. Flexibly designed to plug into an outlet or run on AA batteries, it also powers your camcorder. Horizontal panning and recording can be powered by the pan table, or controlled remotely over the internet with your mobile device and the new CameraAccess plus app^^. Keep an eye on your baby from another room, check on pets while you're away for the day, or monitor your home while you're on vacation – the energy-efficient stand-by mode awaits your command so you never need to worry about wasting or running out of power.

PROFESSIONAL WI-FI® FEATURES

Versatile Connectivity for Pro Needs

Canon VIXIA Wi-Fi® technology helps empower professionals to share HD video easily, and in a number of different ways. The VIXIA HF G30 camcorder offers added reliability with dual-band (5 GHz/2.4 GHz) Wi-Fi® capabilities for busy areas where signal interference may occur. Files can be transferred to selected FTP servers for backup, or at times when speed is essential. And a Wi-Fi® Remote allows you to control operations like recording start/stop and zoom, and exposure settings such as iris, shutter speed and gain.

^ Compatible with iOS version 5/6 or Android version 2.3/4.0/4.1/4.2 for select devices. MP4 35 Mbps and AVCHD 28 Mbps recordings are not supported for this function.
^^ Compatible with iOS version 5/6/7 or Android version 2.3/4.0/4.1/4.2 for select devices. Operations not guaranteed with all versions of the supported OS. MP4 35 Mbps and AVCHD 28 Mbps recordings are not supported for this function. ††† There is no guarantee that the operations will work with all Wi-Fi environments.

FULL HD RECORDING

Brilliant Clarity in Every Detail

FULL HD 1920×1080

Select VIXIA High Definition camcorders not only capture images in Full HD, but record and output at 1920 x 1080 as well, so you get Full HD from lens to screen. Because this meticulous level of detail is fully supported by the superb Genuine Canon Optics and proprietary Canon **DiG!C DV** HD video image processing technologies, Canon camcorders offer an HD experience that will astound you.

DUAL RECORDING

MP4 / AVCHD

Dual Recording helps ensure that no matter how you decide to use the video you've recorded, you'll have the right format available. VIXIA camcorders with Dual Recording simultaneously record video in both MP4 and AVCHD formats. The widely used MP4 format provides quick, conversion-free playback on compatible tablets and smartphones, and lets you upload videos directly to social networking sites for easy sharing with friends, family and the world – anytime, anywhere. AVCHD format is perfect for watching videos on HDTVs or archiving them to Blu-ray discs.

Powered IS ON

Powered IS OFF

CANON OPTICAL IMAGE STABILIZER TECHNOLOGY

SuperRange OPTICAL IMAGE STABILIZER DYNAMIC · POWERED IS · INTELLIGENT IS

Smarter IS for Sharp, Steady Video

Canon Optical Image Stabilization technology helps to reduce the shake of handheld shooting for sharp, steady video in any situation. Dynamic SuperRange OIS provides continuous adjustment throughout the entire zoom range to correct a broad range of camera shake. Extra compensation is applied at wide-angle focal lengths to help reduce shaking that occurs while walking. Powered IS provides compensation at the telephoto end of the zoom range where camera shake is magnified. Intelligent IS analyzes movement and applies the best shake correction method for the shooting situation. Select VIXIA camcorders add roll axes correction, for a total of five-axis correction.

INSTANT AUTOFOCUS

The Fast, Sharp Focus HD Demands

Instant AF

Sharp focus is crucial when shooting high definition video. Canon's proprietary Instant Autofocus system delivers fast, accurate focus, even when you're shooting in bright light, at night, or with the camera in motion. First, an external sensor uses fast phase difference detection to calculate the distance to the subject and establish initial quick focus. Then, the internal CMOS image sensor is used with Canon's TTL-AF technology to establish final focus with outstanding precision. This revolutionary hybrid system decreases focusing time and helps ensure consistently sharp video.

VIXIA HF G30

HIGH DEFINITION FLASH MEMORY CAMCORDER

Wi Fi CERTIFIED

Brilliant Imaging Performance with Wi-Fi® Connectivity

- Genuine Canon 20x HD Video Lens (35mm equivalent: 26.8mm–576mm) with 8-Blade Circular Aperture and Manual Focus Ring delivers exceptional image quality with smooth backgrounds and precise control.
- 1080/60p recording in MP4 (35 Mbps) and AVCHD Progressive (28 Mbps) for high-quality capture of moving subjects; Slow- and Fast-Motion recording; plus Native 24p recording.
- Built-in Wi-Fi® (Dual Band 5 GHz/2.4 GHz) allows you to wirelessly share your images and video or send to a PC. Upload virtually anywhere on your iOS® device with the free Canon Movie Uploader app✧ and Wi-Fi® Remote enables remote control of camcorder settings and operations.
- Canon 2.91 Megapixel HD CMOS Pro Image Sensor and new DIGIC DV 4 Image Processor provide high sensitivity and wide dynamic range for exceptional imaging performance.
- 3.5-inch OLED Touch Panel Display (approx. 1,230,000 dots) and joystick offer fast and easy control, plus a Tilt Electronic Viewfinder (approx. 1,560,000 dots).

Wi Fi CERTIFIED · FULL HD 1920×1080 · HD Video Lens · 8-Bladed Circular Aperture · OPTICAL WIDE-ANGLE LENS · HD CMOS PRO · DIGIC DV 4 · SuperRange OPTICAL IMAGE STABILIZER DYNAMIC · POWERED IS · Instant AF · MP4 35Mbps · AVCHD · OLED · Touch Panel · 24p Native Progressive · Cinema-Look Filter · High-SNR Microphone · SDXC

20x Optical Zoom | SD 2 Card Slots

20x Optical Zoom

The far-reaching 20x Optical Zoom featured on the VIXIA HF G30 camcorder allows you to get in close even when you're far away.

KIT CONTENTS

- VIXIA HF G30 Camcorder
- Lens Hood with Lens Barrier
- Battery Pack BP-820*
- Compact Power Adapter CA-570*
- Wireless Controller WL-D89*
- USB Interface Cable IFC-300PCU/S
- Stereo Video Cable STV-250N*
- Mini-HDMI Cable HTC-100/S*
- PIXELA Video Browser Software Disc
- Photo Applications/ Audio Data Disc

SDHC/SDXC memory cards are recommended for capacity and guaranteed speed. Class 4 or higher speed required for 1920 x 1080 recording mode.
*✧ This software enables you to upload images to social network sites. Before uploading images, please be aware that image files may contain privacy related information such as people and places. If necessary, please delete such information. Canon does not obtain, collect or use such images or any information included in such images through this software. Compatible with iOS version 5/6 or later for select devices. * Also available as optional accessory.*

VIXIA HF G20

HIGH DEFINITION FLASH MEMORY CAMCORDER

Experience Pro-Level Imaging

10x Optical Zoom | 32GB Internal Memory | SD 2 Card Slots

- Genuine Canon 10x HD Video Lens (35mm equivalent: 30.4mm – 304mm) with 8-Blade Iris delivers exceptional image quality with smooth backgrounds for professional-looking results.
- Canon HD CMOS Pro Image Sensor is a professional-level 1/3-inch native 1920 x 1080 image sensor which delivers outstanding video resolution, improved low-light performance✧✧, and a wide dynamic range.
- Record up to 12 hours of crisp high-definition video to a 32GB internal flash drive or directly to 2 memory card slots (SDHC/SDXC compatible); Relay Recording automatically switches video recording to the memory card when the internal drive becomes full.
- Dynamic SuperRange Optical Image Stabilization corrects a full range of motion and Intelligent IS automatically chooses from four different modes to optimize image stabilization for the shooting condition.
- 3.5-inch Touch Panel LCD offers fast and easy control right at your fingertips plus an Electronic Viewfinder.

HD CMOS Pro Image Sensor
A 1/3-inch native 1920 x 1080 image sensor, HD CMOS Pro incorporates technology proven in professional-level Canon camcorders to deliver outstanding video resolution, superb low-light performance and a wide dynamic range.

VIXIA HF R52 | HF R50 | HF R500 NEW

HIGH DEFINITION FLASH MEMORY CAMCORDER

Beautiful HD Memories Made Simple

57x Advanced Zoom | 32GB Internal Memory | SD Card Slot

- 57x Advanced Zoom and SuperRange Optical Image Stabilizer helps provide outstanding, steady video.
- Canon 3.28 Megapixel Full HD CMOS Image Sensor.
- **DiG!C DV 4** Image Processor captures video at 1920 x 1080 resolution and helps provide exceptional imaging performance.
- 1080/60p recording in MP4 (35 Mbps) and AVCHD Progressive (28 Mbps) for high quality capture of moving subjects.
- Built-in Wi-Fi®** allows you to easily share your images and video§§.
- Live Streaming** allows you to record and view live video on your compatible Android™ or iOS® device^, and even control your camcorder from a remote location.
- Compatibility with new Camera Pan Table CT-V1** enables you to remotely pan the camcorder up to 200-degrees left to right from a compatible smart device^ via Wi-Fi® connectivity.
- Dual Recording** allows you to simultaneously record movies in MP4 and AVCHD format. Built-in downconversion creates MP4 files for easy sharing on the web.

- VIXIA HF R52/R50/R500
- Battery Pack BP-718*
- Compact Power Adapter CA-110*
- Mini-HDMI Cable HTC-100/S*
- USB Interface Cable IFC-300PCU/S

FULL HD 1920×1080 · HD Video Lens · HD CMOS Pro · DIGIC DV 4 · SuperRange Optical Image Stabilizer Dynamic · Intelligent IS · Powered IS · Advanced Zoom · MP4 35Mbps · AVCHD Progressive · Wi Fi Certified · Dual Flash Memory (HF R52, R50) · 3.0" Wide LCD · Touch Panel · Smart Auto · Face Detection Technology · SDXC

*SDHC/SDXC memory cards are recommended for capacity and guaranteed speed. Class 4 or higher speed required for 1920 x 1080 recording mode. ** VIXIA HF R52 and HF R50 only. §§ Initial setup is required. ^ Compatible with iOS version 5/6/7 or Android version 2.3/4.0/4.1/4.2 for select devices. Operations not guaranteed with all versions of the supported OS. MP4 35 Mbps and AVCHD 28 Mbps recordings are not supported for this function. * Also available as optional accessory.*

VIXIA mini X

NEW

HIGH DEFINITION FLASH MEMORY CAMCORDER

Wi-Fi CERTIFIED

Innovative Performer

- Canon f/2.8 fisheye lens offers a unique and creative perspective.
- The Canon HS SYSTEM – 12.8 Megapixel High-Sensitivity CMOS image sensor combined with the Canon DIGIC DV 4 Image Processor – helps provide excellent low-light performance.
- Record Full HD video in MP4 (30p/24p) or AVCHD (60i) format to a removable SD memory card.
- Outstanding audio quality with Linear PCM audio recording*, a high-quality built-in stereo microphone and Audio Scene Select.
- Shoot in Wide mode, or choose Close-up mode with image stabilization to help correct camera shake.
- Professional level support with features like embedded time code and uncompressed HDMI output.
- Microphone terminal with manual audio level control, and headphone terminal provide superb flexibility.
- Built-in Wi-Fi® allows you to easily share your photos and video§§.

SD Card Slot

Professional Audio Quality

The VIXIA mini X delivers professional quality audio perfect for business applications and demanding enthusiasts. Linear PCM audio recording plus an advanced microphone that greatly reduces noise and picks up a wider dynamic range help ensure clear recording at all volumes.

Wi-Fi CERTIFIED

You're the Star

- An innovative and compact personal camcorder providing the excitement of sharing your hobbies/interests with ease; perfect for bloggers.
- Canon f/2.8 fisheye lens (160° movies/170° photos) offers a unique and creative perspective so you can show off your talents or capture moments in a whole new way.
- Shoot in Wide mode to capture an ultra-wide view of the entire scene or Close-up mode to crop-in and emphasize your subject, and quickly toggle from one to the other with the touch of the LCD screen.
- The 12.8 Megapixel High-Sensitivity CMOS image sensor combines with the Canon DIGIC DV 4 Image Processor to create the Canon HS SYSTEM, allowing you to capture stunning Full HD video in MP4 format and 12.0 Megapixel photos with exceptional image quality, all to a removable microSD memory card (SDHC/SDXC compatible).
- A high-quality built-in stereo microphone helps bring life to your videos by capturing superb audio, while Audio Scene Select provides multiple options to help enhance the sound for a particular setting even further.

micro SD Card Slot

Innovative Design

The VIXIA mini camcorder is pocket-sized and weighs approximately 5.6 ounces** for incredible portability, has a built-in stand and tripod socket for easy self videos, and a tiltable LCD monitor that allows shooting from virtually any angle – perfect for videos where you're the star.

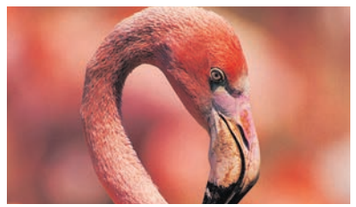
VIXIA TECHNOLOGIES

ADVANCED ZOOM

IMPROVED



Canon's exclusive Advanced Zoom system combines Genuine Canon Optics with proprietary Canon **DiG!C DV** Image Processor technology to deliver an extended seamless zooming range with superb image quality. Advanced Zoom boosts the native optical zoom range up to 57x with the VIXIA HF R-Series camcorders.

Advanced Zoom

SELECTABLE FRAME RATES

Native 24p Mode allows recording at 24 frames per second – a big advantage for serious filmmaking.

24p Native Progressive

24p Cinema Mode[1] offers a video frame rate of 24p with the option to adjust color and tonal characteristics to evoke the look and feel of a big-screen movie.

24p Cinema Mode

30p Progressive Mode[1] is a professional-level feature that delivers clarity to fast-action subjects and is ideal for clips intended to be posted on the Web.

30p Progressive

AUDIO SCENE SELECT

IMPROVED

Forest and Birds

Music

Audio Scene Select makes it easy to capture clear, high quality audio with a choice of up to eight audio modes to choose from based on your shooting situation: Standard, Music, Speech, Forest and Birds, Noise Suppression, Meeting, Festival and Custom Setting. Each of these modes has pre-determined optimized settings best suited for the shot you're capturing, resulting in realistic and immersive audio.

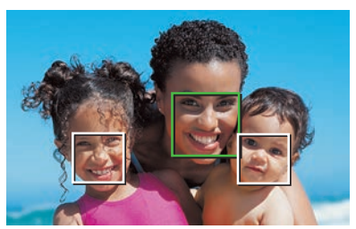
Audio Scene SELECT

TOUCH SCREEN MONITORS

Select VIXIA camcorders have Capacitive Touch Panel LCD Screens. Just as with your smartphone or tablet, the display is clear and vivid, and a gentle touch activates intuitive functions. The VIXIA HF G30 camcorder uniquely features an OLED Touch Panel Display, which provides excellent contrast, brilliant color reproduction and a wide viewing angle. Both types of monitor enable fluid control of camcorder operations for easy shooting.

Touch Panel

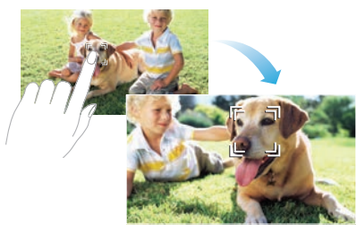
GENUINE CANON FACE DETECTION



Canon's remarkable Face Detection technology automatically detects up to 35 faces and displays up to nine detection frames at one time. Continuous autofocus and auto exposure tracking of detected faces keep main subjects sharp and clear throughout each scene. The system is so intelligent that it recognizes faces that are turned down or sideways. In addition, a specific face may be selected as the main subject for continuous tracking.

Face Detection AF/AE/FE/WB

TOUCH & TRACK



Touch & Track allows any subject (pets, vehicles, etc.) to be the focal point of your video simply by selecting it on the Touch Panel LCD. It allows you to concentrate on shooting the scene while the camcorder continuously tracks the selected subject, automatically adjusting focus and exposure as needed. You can also choose to adjust focus or exposure independently by selecting Touch Focus or Touch Exposure.

60P / 35 MBPS RECORDING

Select VIXIA models give you high quality recording with a bit rate of 35 Mbps and support for 1080/60p. Images captured at a rate of 60 fps help ensure even fast-moving subjects show up crisply with movements and patterns clearly recorded. The high bit rate produces video with excellent detail and faithful rendering of moving edges, plus enhanced color and fine tonal gradation. Lower bit rates perfect for various applications are also available.

BUILT-IN DOWNCONVERSION

Select VIXIA camcorders have a built-in transcoding function that converts AVCHD files to MP4s, or from MP4 to MP4[2]. The function allows users to generate MP4 files from the internal media and save to an SD card – ideal for sharing and uploading to the Web. The downconverted video files can be quickly and easily edited, shared online via video and photo sharing sites. No matter how you decide to use the video you've recorded, you'll have the right format available.

SMART AUTO

With Smart AUTO

Without Smart AUTO

Smart AUTO makes shooting great video easy. Using the power of Canon **DiG!C DV** Image Processors, the camcorder intelligently detects and analyzes faces, brightness, color, distance and movement, then automatically selects the best settings for the scene. Whether you are capturing a sunset, a day at the beach, or a fast-paced soccer game, Smart AUTO helps ensure optimal recording for beautiful images and superb results.

Smart AUTO

STORY CREATOR

Now updated with more helpful functionality, Story Creator assists you in producing organized videos with logical storylines. Choose one of five different themes – Travel, Kids & Pets, Party, Ceremony and Blog – and the camcorder provides a list of suggested scenes plus specific shooting tips that help with scene structure and composition. After you've captured your footage, Story Creator helps you categorize, rate and reorder your scenes, making it easy to create your masterpiece.

Story Creator

CINEMA-LOOK FILTERS

DRAMATIC B&W

Choose from among nine filters as you record to reproduce professional cinematic looks. Cinema Standard recreates the warm tones of classic film. Cool adds a bluish, futuristic tint. Dramatic B&W creates bold, high-contrast B&W movies. Dream* provides a soft focus effect. Memory* produces a misty "flashback" look. Nostalgia recreates the look of old TV programs. Old Movie produces an aged appearance. Sepia applies an antique tint. Vivid accentuates primary colors.

Cinema-Look Filter

BABY MODE

IMPROVED

Baby Mode helps you easily capture your baby's development in the high quality of the AVCHD standard, with select new VIXIA camcorders allowing you to register up to three babies. The Pre REC function helps ensure you'll never miss a precious memory. All Baby Mode videos are chronologically saved into a special Baby Album for seamless playback following the growth of your child. You can stamp videos with your baby's height, weight and even the number of days old, now with more designs and animations available to personalize each moment.

Baby Mode

1. *Records in 60i.*
2. *Conversion is not supported from MP4 (35 Mbps) and AVCHD Progressive (28 Mbps).*

* *Available on the VIXIA HF G30 and VIXIA HF G20 camcorders.*

GO WHEREVER THE STORY TAKES YOU

CINEMA EOS

LEAVE NO STORY UNTOLD

Designed from the ground up, the Canon Cinema EOS System was created to serve the evolving needs of the cinematography world. Beginning with the revolutionary EOS C300 Digital Cinema Camera, the Cinema EOS System also includes the EOS C500 4K Digital Cinema Camera, the EOS-1D C 4K DSLR Cinema Camera – which was the first hybrid DSLR camera to record in full 4K, the versatile EOS C100 Digital Video Camera, and a complete lineup of Cinema Lenses. Also compatible with the evolving lineup of Canon EF Lenses and complemented by an extensive service, support and education infrastructure, the Canon Cinema EOS System offers amazing versatility to help storytellers leave no story untold.

Wireless Printing

PIXMA MG7120

Wireless Inkjet Photo All-In-One

Premium Wireless[1] All-In-One with Cloud Link Printing Options

The new PIXMA Printing Solutions (PPS)[2] app easily lets you print and scan photos or documents from your mobile device[7]. With the cloud print function you can print directly from select online cloud services either at the printer itself or with your mobile device using the free PPS app. The PIXMA MG7120 printer also has a built-in 3.5" touch screen LCD, and the intelligent touch system to make navigating the menus and options as simple and intuitive as possible. Connectivity is outstanding with Wi-Fi®, AirPrint™[5], Ethernet, Google Cloud Print™[6], and more! The PIXMA MG7120 even has gray ink for great looking black & white photos.

Wireless Printing

PIXMA MG5520

Wireless Inkjet Photo All-In-One

Advanced Wireless[1] All-In-One with Remarkable Photo and Document Quality

The PIXMA MG5520 printer offers a wide array of great features such as Wi-Fi®, AirPrint™[5], Auto Power On, Auto Scan Mode[12], Quick Start, Auto Duplex Printing and Quiet Mode. It also features the new PIXMA Printing Solutions (PPS)[2] app that easily lets you print and scan photos or documents from your mobile device[7]. With the cloud print function you can print directly from select online cloud services either at the printer itself or with your mobile device using the free PPS app.

Wireless Printing

PIXMA MG3520

Wireless Inkjet Photo All-In-One

Compact Wireless[1] All-In-One with Auto Duplex Printing

The PIXMA MG3520 printer packs a lot of features in a small package. It features a hybrid ink system which uses pigment ink for dark, black text and dye ink for beautiful photos. The PIXMA MG3520 is also compatible with the new PIXMA Printing Solutions (PPS)[2] app which lets you easily print and scan photos or documents from your mobile device[7]. In addition, PPS offers a variety of other features such as an online manual, the ability to change printer settings, and even view status information – all without turning on a computer.

CanoScan 9000F Mark II

Film & Negative Scanner

High Speed 9600dpi[8] CCD Scanner with Built-In Professional Film Scanning

The CanoScan 9000F Mark II Color Image Scanner has 7 easy buttons to quickly copy, scan, e-mail or create multi-page PDF documents. For fast scanner operation, the White LED eliminates warm-up time[10], and built-in FARE 3.0 retouching technology helps to enhance your final images. The built-in backlight lets you scan negatives, slides and even Medium Format film.

PIXMA PRO-1

Professional Inkjet Printer

Exactly as You Envisioned

The PIXMA PRO-1 printer delivers professional caliber performance and high-speed large-scale printing up to 13" x 19". It features an up to 4800 x 2400 dpi[3] FINE print head and 12 individual LUCIA ink tanks for phenomenal black and white prints. The Chroma Optimizer helps enhance blacks, delivers an expanded color gamut and provides a uniform gloss across the print. The OIG System helps define the optimal mix of colors and placement for smooth gradation, with reduced graininess, bronzing and metamerism.

Wireless Printing

PIXMA PRO-10

Wireless Professional Inkjet Printer

Professional Pigment Based Wireless[1] Photo Printing

Using a 10-ink pigment color system combined with the Optimum Image Generating System and Chroma Optimizer results in stunning prints up to 13" x 19". Three dedicated black inks produce incredible monochrome prints and smooth tonal gradations so your pictures come out exactly as you envisioned.

Wireless Printing

PIXMA PRO-100

Wireless Professional Inkjet Printer

High-Speed and High Performance Wireless[1] Photo Printing

The 8-ink dye based ChromaLife 100+ system combined with the Optimum Image Generating System gives you the tools you need to faithfully reproduce your images. Add to that the easy-to-use Print Studio Pro software and connectivity options like Wi-Fi®, Ethernet and USB, and you have a professional machine that easily fits into your workflow.

NEW

Wireless Printing

SELPHY CP910

Wireless Compact Photo Printer

High Quality, Easy-to-Use Wireless[1] Compact Photo Printer

Light and compact, you can print beautiful, borderless photos in vibrant color or Black & White in Card or Postcard size whenever you are ready, wirelessly! These prints will be water-resistant and can last up to 100 years[11]! Preview your images on the 2.7" Tilt-up LCD and easily turn your favorite pictures into an art-inspired collage with the image Shuffle feature.

*1. Wireless printing requires a working network with wireless 802.11 b/g or n capability. Wireless performance may vary based on terrain and distance between the printer and wireless network clients. 2. Requires an Internet connection and the PIXMA Printing Solutions ("PPS") app, available for free on the App Store and at Google Play. Compatible with iPad, iPhone 3GS or later, and iPod touch 3rd generation or later devices running iOS 5.1 or later, and Android mobile devices running Android 2.3 or later. User must register printer with PPS and be a registered member of the compatible online cloud service(s) user chooses to access through PPS and is subject to the terms and conditions of those services. Certain functions (scanning and printing locally stored photos/documents) require your device to be connected to the same working network with wireless 802.11 b/g/n capability as your printer. For users of compatible Apple mobile devices, document printing requires Apple AirPrint, which requires an AirPrint-enabled printer connected to the same network as your iOS device. A printer connected to the USB port of your Mac, PC, AirPort Base station, or Time Capsule is not supported. 3. Resolution may vary based on printer driver setting. Color ink droplets can be placed with a horizontal pitch of 1/4800 inch or 1/9600 inch at minimum depending on printer model. 4. Canon cannot guarantee the longevity of the prints; results may vary depending on printed image, drying time, display/storage conditions, and environmental factors. See usa.canon.com/chromalife100plus for additional details. 5. AirPrint functionality requires an iPad, iPhone 3GS or later, or iPod touch 3rd generation or later device running iOS 4.2 or later, and an AirPrint-enabled printer connected to the same network as your iOS device. A printer connected to the USB port of your Mac, PC, AirPort Base station, or Time Capsule is not supported. 6. Requires an Internet connection and Google account. Subject to Google Terms of Service. Certain exceptions may apply. 7. Document printing for Android available November 2013 or later. 8. Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard. 9. Envelopes and High Resolution Paper are not supported for borderless printing. **For the PIXMA PRO-1, PRO-10, and PRO-100 paper types NOT supported for borderless printing are as follows: Plain paper, Photo Stickers, Fine Art Paper "Photo Rag™", Fine Art Paper "Museum Etching", and other Fine Art Paper.** 10. The time required for the light source to reach sufficient operating temperature. Film scanning excluded. 11. Based on accelerated dark storage testing by Canon under controlled lighting, temperature and humidity conditions. Canon cannot guarantee the longevity of the prints; results may vary depending on printed images, display/storage conditions and environmental factors. 12. For network users, Auto Scan Mode is available only when scanning at a computer using My Image Garden software and selecting the 1-click feature then "Save to PC."*

EDUCATION & INSPIRATION

CANON **DIGITAL LEARNING CENTER**

Education & Inspiration

The Canon Digital Learning Center (CDLC) is a free online educational resource designed to help users advance their skills with professional Canon imaging products. Visit our website and you will discover an ever-growing collection of free educational content such as:

- Video tutorials and other how-to content
- Weekly blog written by Canon product experts and special guest contributors
- Downloadable QuickGuides and White Papers
- Instructional articles
- Canon product knowledge base

The CDLC also inspires at every step – read interviews with renowned imaging experts and browse through galleries of eye-catching and history-making photos, videos and short films.

CANON **LIVE LEARNING**

Learn from the Pros

Canon Live Learning (CLL) presents exclusive educational experiences offered around the country delivering dynamic learning opportunities for enthusiasts and professionals through workshops and high-quality hands-on classes. Led by industry experts and professional photographers, including Canon's Explorers of Light, you will gain both technical and creative expertise through these exciting programs.

For Professionals

Canon provides professional imagemakers with the high-level instruction and educational resources needed to stay in touch with industry demands across the country, including the Canon Hollywood Professional Technology & Support Center. With instruction from industry pros, discover new creative and technical opportunities made possible by EOS HD-capable DSLR cameras. Our hands-on intensive workshops are designed for video and film professionals who want to master the cinematographic capabilities of the EOS HD DSLR camera, as well as still photographers looking to expand their professional offerings to the moving image. Additionally, new offerings are always in development for our professional imagemakers.

For Enthusiasts

Canon brings enthusiasts to a new level of experience with the Canon In Action Tour. This Saturday Seminar and Sunday Workshop series teaches enthusiasts the keys to maximizing their personal vision through field-proven techniques and creative insights. Get in on the action and learn to use your camera inside and out, venture out of "Auto" mode, harness the power of video, maximize the potential of Speedlite flashes, and create images like a pro – with depth, dimension and detail. For the adventuresome enthusiast, Canon combines some of the most beautiful and exciting locations in the USA with our elite Explorers of Light instructors for the EOS Destination Workshops. These intimate multi-day workshops take the CLL experience into the field. Our most recent addition to the Canon Live Learning course offerings is in the San Francisco region. The CLL San Francisco space provides ongoing access to photo education programs for all levels of Canon users, tailoring to their camera and needs.
